

Our subscription licences are available for video files and hosted solutions.

Video files

We supply the videos files in a number of sizes and formats which you can then use on your own intranets or learning management systems. This is the cheapest solution as there are no hosting costs.

Hosted

Videos are hosted by a third party. One of the main advantages of this is that they are able to detect what device the video is being viewed on, and deliver the best version of the video automatically to that device. This is a very effective when viewers have different browsers or are using mobile devices such as smartphones.

We are happy to also supply copies of the video files if you subscribe to the hosted solution.

All prices are for annual subscriptions.

User licence – video files

*Employees	Individual	All (6)
1-50	£49	£199
51-250	£79	£299
